ABOUT ME

AI can accelerate how we build software, but it cannot replace how we think. As a Software Engineer, I believe our role is not only to write code, but to understand problems, evaluate solutions, make responsible decisions, and design technology around human needs. AI can provide the tools and possibilities, but human judgment, creativity, and empathy are what turn those possibilities into meaningful solutions.

HARD SKILLS

- Programming: Python, PHP, SQL,
- Web Development: HTML, CSS
- AI: AI Integration & Application
- IoT: IoT Systems & Hardware Integration
- Innovation: Technology Innovation & Prototyping

SOFT SKILLS

- Creativity and Problem-Solving
- Critical Thinking
- Organizational Communication Management
- Leadership
- Accountability

SOFTWARE ENGINEER STUDENT AT THAMMASAT UNIVERSITY

EDUCATION

THAMASAT UNIVERSITY

SOFTWARE ENGINEER
2026 – current

PSU.WITTHAYANUSORN SURATTHANI SCHOOL

SCIENCE-MATHEMATIC STUDY PLAN
2020 – 2026

EXPERIENCES

MySchool – Smart School Portal & AI Learning Platform React Native · Expo · Google Gemini AI

- Developed a multi-role school platform serving students, parents, teachers, and administrators in a unified ecosystem.
- Integrated Google Gemini AI for intelligent learning assistance, including AI Tutor, Teacher Copilot, quiz generation, and Family Advisor.
- Engineered role-based authentication, navigation, academic management, and student well-being features with React Native and Expo.

AI-Based Plant Nutrient Deficiency Detection System Coding Thailand 2025 – DEPA Thailand | Team of 3

- Developed an AI system for detecting NPK deficiencies using Raspberry Pi 5, YOLOv8, and CIRA CORE.
- Implemented real-time image detection, LINE notifications, and a 3D-printed prototype.
- Advanced to the National Round and received a Bronze Award with 158,800 THB in funding.
- Contributed to establishing an IoT Learning Center at the school.

IT Support Intern – P.C. Tower & Property (1996) Co., Ltd. Apr 17-30, 2025

- Provided IT support and troubleshooting for hardware, software, Network, CCTV, and UPS systems.
- Repaired computers, migrated SSDs, and installed/configured printers to minimize downtime.
- Gained hands-on experience in IT troubleshooting, problem-solving, and network support.
